<u>Calendars App Instructions</u>

<u>General:</u>
- This app takes in user input to navigate through the app and outputs information onto the console
- All of the prompts give instructions on exactly what kinds of commands are acceptable for each action (i.e. "Select a CALENDAR action (**add/delete/update/view/share**)"). The bolded words should be **entered as commands** to facilitate the desired action
- When selecting a specific Calendar to manipulate, make sure to follow the instructions and enter the NUMBER of the Calendar listed on the screen
- Every time you make a change, addition, or deletion, the updated information is displayed in the console
- Make sure to follow the EXACT FORMAT shown in the parentheses for each command, especially the (MM/dd/yyyy) and (HH:mm) formats for date and time
- You should note that I designed for time to be in military time format, so if you wanted to make 6:30pm one of the times, you would simply enter 18:30 instead

<u>Navigating & Commands:</u>
- Upon launching the app, you asked to enter a username and are then taken to the [HOME] screen, that has the following prompt: **[HOME] Select a CALENDAR action (add/delete/update/view/share) or a USER action (create/switch)**
    - **add**: takes you to [CALENDAR] screen and prompts you to add a new Calendar for the current User
    - **delete**: takes you to [CALENDAR] screen and prompts you to delete a specific Calendar
    - **update**: takes you to [CALENDAR] screen and prompts you to make a choice between updating the Calendar Settings or Events: **(settings/events)**
        - **settings:** takes you to [SETTINGS] screen and prompts you to choose a Calendar setting to change: **(name/privacy/timezone/theme)** (entering each command is self-explanatory)
        - **events:** takes you to [EVENT] screen and prompts you to choose an Event action: **(add/delete/edit)**
            - **add:** takes you to [EVENT] screen and prompts you to add a new Event to a desired Calendar
            - **delete**: takes you to [EVENT] screen and prompts you to delete a specific Event from a desired Calendar
            - **edit**: takes you to [EVENT] screen and prompts you to choose an event detail to change: **(name/date/start/end/repeat)** (entering each command is self-explanatory)

- **view:** takes you to [VIEW] screen and prompts you to choose which view option you wish to display the Calendar as: **(day/month/year)** (entering each command is self-explanatory)
- **share:** takes you to [SHARE] screen and prompts you to choose a User to share a desired Calendar with
- **create:** takes you to the [USER] screen and prompts you create a new User
- **switch:** takes you to the [USER] screen and prompts you to select a User to switch into and make the new current User
